less water

**PROPRIETARY
WATER
MANAGEMENT**

SAVE water

Limited supplies, increasing demand, escalating rates and growing rules and regulations all point toward the need for environmental stewardship with regards to water use.

SAVE money

Reduce outdoor water use by up to 50% and qualify for incentives and rebates where available. This adds up to one thing for you - **lower water bills.**

SAVE green space

AquaCents absorbs and holds available water and soil nutrients and delivers up to 96% of them to the root zone on demand. This saves water, minimizes stress on the turf, and reduces fertilizer loss.
